THE NEWS-BULLETIN

VOL. 4 NO. 49

MOKENA, ILLINOIS, JULY 8, 1923

\$1.25 per year

NEWS-BULLETIN NOW HAS "MISS MERC" ON ITS STAFF AND WE TAKE PLEASURE IN SHOWING HER PICTURE TO YOU HERewith IN THIS ISSUE

With a great deal of satisfaction the editor of the NEWS-BULLETIN announces the installation of a new Linotype. This mechanical marvel qualifies us to serve efficiently the large number of persons who look to our publication for enlightenment and entertainment, and who patronize our job printing department.

The rapidly increasing circulation of the NEWS-BULLETIN together with our desire to place at the command of our advertisers and others the highest grade of typography, induced us to secure a fine composing machine for the quick and accurate and pleasing presentation of the news of the day, and the production of superior job work.

Our new Linotype enables us to set by machine many forms of composition that previously necessitated tedious work by hand. Our plant is now capable of turning out composition consisting of correct type faces in many different sizes, and the change from one size to another is made very quickly. At a high rate of speed the versatile operator, whose hand is made famous by the Mergenthaler Linotype Company as "the hand that keeps the world informed"—produces line after line of the sort of composition desired.

This installation is a testimonial to the prosperity of the community in which the NEWS-BULLETIN circulates. And that the good people of the community are duly appreciative of our efforts to serve them in all departments of the printing business is manifested by the many compliments received from individual patrons since the arrival of our new machine.

The accompanying illustration will give our readers some idea of the marvelous mechanism of the Linotype, a composing machine on which are assembled matrices (or little brass molds) and lines of type cast—lines such as you are now reading.

Besides enabling the operator to set various faces and sizes of type our new Linotype makes it possible for him to produce the rules and dashes and borders which are used in various advertisements in each issue of our publication. When employed in the composing of advertisements, newspaper headings, booklets, catalogues, and various other kinds of printed matter, our new machine enables one operator to set in the same time more type than type ordinarily could be produced by five or six men or women doing the work by hand—and the composition is incomparably better.

While for a long time we have received the patronage of a host of subscribers, advertisers and printing buyers in general, we look forward to the handling of an even greater volume of business now that we are so well qualified to render the sort of service most desired.

It has been our aim to present the news of the day without fear or favor, and reflect faithfully the ideals and ambitions of our constituents; and we shall continue to devote our talents and resources to the fulfilling of this aim. And of great help to us in the carrying out of our purpose will be our new Linotype.

SELF RELIANCE

is an asset of every successful man in the business world to-day. Some men are born with a lot of self-reliance, and other men have had to cultivate it.

One of the easiest and surest ways of becoming self-reliant is to start NOW, and save a certain amount every week, or month, till you have a tidy sum in the bank.

The possession of a bank account will give you more confidence in yourself than you ever had before, and you will be better equipped to meet your everyday problems.

The Orland State Bank

SCENE AT KU KLUX KLAN CEREMONIAL AT JOLIET

(Story on back page)

MRS. GEO. A. KERR OF MOKENA FILES BILL FOR DIVORCE

Mrs. Bessie B. Kerr, wife of Dr. George A. Kerr late of Mokena, has filed a bill for divorce in the circuit court at Joliet against the latter, charging him with extreme and repeated cruelty at various times. She charges that he has beaten and struck her within the past six months, also that he has neglected to furnish her proper and necessary support and refuses her money.

Mrs. Kerr states that on one occasion when he returned home at an unreasonable hour at night he grew angry when she asked him as to where he had been and she declares he used profane language and attempted to lock her in a room. The last time he beat her according to her charge was on April 10, 1923. He had been absent from home for several days and when she asked him to account for his absence, she charges he struck her and used profane language. Mrs. Kerr further charges in her bill that on December 29, 1922 she discovered certain Christmas gifts that had been sent to the defendant and when she sought an explanation he grew angry and attempted to beat her.

Mrs. Kerr further claims that the defendant has an income of \$5,000 per year and that he has threatened to dispose of the home in Mokena together with the household furniture and goods and not to provide her with alimony.

In view of these threats, Mrs. Kerr prays the court in her bill for an injunction restraining the defendant from selling or exercising title or possession of the household goods as well as the residence in Mokena or from issuing or transferring his interest in the contract for the purchase of the premises dated, March 4, 1920, said premises consisting of a story and a half cottage. As she has no other source of income, the plaintiff prays the court that the defendant be compelled to pay her a sufficient sum of money to employ counsel and for her support during the pending of the suit which is to come up for a hearing in the circuit court at the September term.

The couple were married on January 20, 1903 at Palmer, Ill. There are no children. Attorney Albert Krusemark is the complainant's solicitor. The complainant also asks in her bill that he maiden name Bessie B. Best be restored to her.

WANTED—5 to 10 Acres with house near Mokena. Give definite particulars in first letter if possible. Address B. I. News-Bulletin.

On account of the rain the German M. E. Sunday School picnic which was to be held last Sunday has been postponed to Saturday afternoon July 7th, 1923 at Conrad Andres place near Tinley Park, Ill.

LIGHTNING STRIKES BARN AT TINLEY PARK THE 4TH AND DOES \$4,000 DAMAGE

A very heavy rain storm accompanied by a heavy electrical display swept Tinley Park and vicinity Fourth of July afternoon. During the storm lightning struck a large barn on the farm tenanted by Wm. Andres southeast of Tinley Park on the Homewood road. Mr. Andres and his family had attended the German M. E. Sunday School picnic at the Conrad Andres place so no one was hurt. The fire broke out. The terrific clap of thunder caused people to look for a fire and the big fire was seen at once and despite the heavy rain a big crowd rushed to the scene of the fire, but the building was doomed from the start. Four calves, 15 tons of new hay, a gas engine and many other things burned. The loss is estimated at about \$4,000 which is covered by insurance in the Green Garden Fire Insurance Co. Some of the farm machinery was saved. The Homewood Fire Dept., also came to the fire scene with a chemical truck, but were unable to do anything. Mr. Andres was notified by telephone of the fire and at once hurried home. The wind had shifted after the barn was on fire and for a time a grainery and the dwelling were in danger.

NEWS AND NOTES OF ORLAND

A pretty June wedding was solemnized at the Christ Lutheran church in Orland on June 27th when Miss Helen Lassch, daughter of Mr. and Mrs. John Lassch was united with Edward Schmaedke. Rev. W. C. Greve read the service.

The bride was prettily attired in satin and carried a bouquet of roses. Miss Florence Lassch was the maid of honor. Attending the couple were Milton Eshe and Etta Heusner. Miss Louise Grosskopf was the flower girl. The mesdames Elinor and Emily Waje sang a beautiful duet entitled "Oh Promise Me". Rev. Greve wished the bride and groom a God's blessing and admonished them to always let God's statutes be their song in the house of their pilgrimage. Ps. 119:54.

Following the wedding ceremony the bridal couple went to Blue Island where they had their wedding picture taken. Upon their return to the home of the brides parents a bountiful wedding feast had been prepared and two hundred guests were served. The bridal couple received many beautiful and costly gifts.

Later in the evening four chavari parties came to see the newlyweds. The host of friends of Mr. and Mrs. Schmaedke wish them much happiness. The groom is a hustling and energetic young man. He has been associated with Wm. Hostert, the auctioneer.

Miss Marie Steffen of Orland, daughter of Mr. and Mrs. Philip Steffen and son of Mr. and

Lutheran Immanuel Church Mokena

Sunday, July 8 at 10 a. m., Rev. W. J. Kemnitz will speak on "The Doctrine of Holy Baptism". Sunday School at 9:15.

The Ladies Aid will meet on July 11th.

The Young People's Society meets July 13. Picnic committee July 12. All meetings to begin at 7:30 p. m. Plans for our annual picnic will be discussed.

Sunday, July 15 divine service in the German language at 10 a. m. The Lutheran Hospital Chorus of Chicago will beautify the service by a number of selections. After having attended service you can have a good time at the picnic afternoon and evening.

Mrs. Barney Jungles were united in marriage at the St. James Church at the Sag. on Saturday afternoon at 2 p. m.

The bride wore a Gray beaded gorgette dress. She wore a band of silver leaves around her head and carried white roses and white peonies. The maid of honor, Ida Wolf, friend of the bride wore a green gorgette dress and carried pink rose and pink peonies. The best man was Mr. Jack Jungles, brother of the groom. After the ceremony the newlyweds were driven to Joliet by the grooms uncle to have their picture taken. They had their supper at the home of Walter Jungles brother of the groom. The newlyweds are making their home at Mr. Harry Jungles brother of the groom near the Sag. All wish them good luck and happiness.

The picnic of Christ Lutheran church proved a success from every viewpoint. A good time was had. The dinner was completely sold out at 1:30, \$62 being cleared from that source alone. All told \$256 was cleared from the first picnic. Everyone reported a good time.

TORISTS INJURED IN PECULAIR AUTO WRECK

A very peculiar auto accident occurred on the highway running north from the Cleveland corner to Mokena Monday morning when a tourist car from Leigh, Ill., over turned in the ditch when the driver lost control of the car. The driver, a man about 45 years old, said he was used to good roads and was hitting a high rate of speed in his new Essex Sedan when he suddenly lost control of the car and the auto turned over twice and landed in the ditch. There were four grown ups and two children in the car. An elderly lady suffered three broken ribs, the driver received a deep scalp cut, his wife was badly cut and bruised while another lady and the children escaped injury.

Dr. W. V. Hedges of Frankfort was called and gave medical aid to the injured who then returned by train to their home in Leigh. They were on their way to Omaha when the accident occurred. The road on which the mishap took place is perfectly straight for half a mile and there was no other car in sight at the time. The car was a total wreck. It was taken to the garage of Heusner, Mager & Geuther at Frankfort.

FRANKFORT NEWS

The families of Mr. and Mrs. Glenn Folkers and Mr. and Mrs. Alfred Zechlin and son Stewart and Mr. and Mrs. Milton Heusner and daughter who went to Indian Lake Michigan, returned Sunday evening. While they were there Mr. Folker and Mr. Zechlin each caught a twelve pound Pike and measuring 36 inches long.

An eight pound boy came to the home of Mr. and Mrs. Wm. Baumgartner on July 1st. All are doing well.

The Frankfort team played the Canton Farm nine on the fourth at Frankfort. The rain stopped the game when the score stood 0-0.

Frankfort will play the same team at Frankfort the first Sunday in September and a rattling good game is promised.

This coming Sunday Frankfort is to play the Manhattan team at the latter town. All the fans are invited.

THREATENS TO BEAT UP OFFICER; PAYS \$51 FINE

A young man from Harvey was arrested Sunday by Alde rman Aug. Hentsch for traveling on the Front street under construction, with his motor cycle. The youth threatened to beat up the village father. But when he was brought before Police magistrate ohn F. Shultz he was a much surprised lad when he had to pay a \$51 fine. A large number of autoists have been arrested lately for driving on the street named as it is closed against traffic until the construction work is finished.

Mokena Chautauqua Dates Announced for August

The dates for the Mokena chautauqua have been announced as follows:

August 25-26-27 & 28, 1923

Lost: Leather bill-fold containing \$62.00 in Mokena Tuesday evening, or in Marley Wednesday. Liberal reward. Finder please return to:

The Strength of the Pines

CHAPTER XXVI

The twilight at Trail's End is never long in duration, due to the simple fact that the mountains cut off the flood of light from the west after the setting of the sun, but tonight there seemed none at all. The reason was merely that heavy banks of clouds swept up from the southeast just after sunset.

They came with rather startling rapidity and almost immediately completely filled the sky. Young Bill had many things on his mind as he rode beneath them, yet he found time to gaze at them with some curiosity. They were of singular greenish hue, and they hung so low that the tops of nearby mountains were obscured.

The fact that there would be no moon tonight was no longer important. The clouds would have cut off any tell-tale light that might illumine the activities of the Turners. There would not be even the dim mist of starlight.

Young Bill rode from house to house through the estate—the homes occupied by Simon's brothers and cousins and their respective families. He knocked on each door and he only gave one little message. "Simon wants you at the house," he said, "and come heeled."

He would turn to go, but always a singular quiet and breathlessness remained in the homes after his departure. There would be a curious exchange of glances and certain significant sounds. One of them was the metallic click of cartridges being slipped into the magazine of a rifle. Another was the bucking on of spurs, and perhaps the rattle of a pistol in its holster. Before the night fell in reality, the clan came riding—strange, tall figures in the half-darkness—straight for Simon's house.

His horse was saddled, too, and he met them in front of his door. And in a very few words he made all things plain to them.

"We've found Dave," he told them simply. "Most of you already know it. We've decided there isn't any use of waiting any more. We're going to the Folger house tonight."

The men stood silent, breathing hard. Simon spoke very quietly, yet his voice carried far. In their growing excitement they did not observe the reason, that a puzzling, deep calm had come over the whole wilderness world. Even in the quietest night there is usually a faint background of winds in the mountain realms—troubled breaths that whisper in the thickets and rustle the dead leaves—but tonight the heavy air had no breath of life.

"Tonight Bruce Folger is going to pay the price, just as I said." He spoke rather hesitatingly, perhaps more to impress his followers than from impulse. Indeed, the passion that he felt left no room for his usual arrogance. "Fire on sight, Bill and I will come from the rear, and we will be ready to push through the back door the minute you break through the front. The rest of you surround the house on three sides. And remember—no man is to touch Linda."

They nodded grimly; then the file of horsemen started toward the ridge. Far distant they heard a sound such as had reached them often in summer, but was unfamiliar in fall. It was the faint rumble of distant thunder.

Bruce and Linda sat in the front room of the Folger house, quiet and watchful and unafraid. It was not that they did not realize their danger. They had simply taken all possible measures of defense; and they were waiting for what the night would bring forth.

"I know they'll come tonight," Linda had said. "Tomorrow night there will be a moon, and though it won't give much light, it will hurt their chances of success. Besides—they've found that their other plot—to kill you from ambush—isn't going to work."

Bruce nodded and got up to examine the shutters. He wanted no ray of light to steal into the growing darkness and make a target. It was a significant fact that the rifle did not occupy its usual place behind the desk. Bruce kept it in his hands as he made the inspection. Linda had her empty pistol, knowing that it might—in the mayhap of circumstance—be of aid in frightening an assailant. Old Elmhurst sat beside the fire, her stiff fingers busy at a piece of sewing.

"You know—" Bruce said to her, "that we are expecting an attack tonight?"

The woman nodded, but didn't miss a stitch. No gleam of interest came into her eyes. Bruce's gaze fell to her work basket, and something glittered from its depths. Evidently Elmhurst had regained her knife.

He went back to his chair beside Linda, and the two sat listening. They had never known a more quiet night. They listened in vain for the little night sounds that usually come stealing, so hushed and tremulous, from the forest. And they both started, ever so slightly, when they heard a distant rumble of thunder.

"It's going to storm," Linda told him.

"Yes. A thunderstorm—rather unusual in the fall, isn't it?"

"Almost unknown. It's growing cold, too."

They waited a breathless minute, then the thunder spoke again. It was immeasurably nearer. It was as if it had leaped toward them, through the darkness, with incredible speed in the minute that intervened. The last echo of the sound was not dead when they heard it a third time.

The storm swept toward them and

increased in fury. On a distant hillside the strange file that was the Turners halted, then gathered around Simon. Already the lightning made vivid, white gashes in the sky and illumined—for a breathless instant—the long sweep of the ridge above them. "We'll make good targets in the lightning," Old Bill said.

"Ride on," Simon ordered. "You know a man can't find a target in the hundredth of a second of a lightning flash. We're not going to turn back now."

They rode on. Far away they heard the whine and roar of wind, and in a moment it was upon them. The forest was no longer silent. The peal of the thunder was almost continuous.

The breaking of the storm seemed to rock the Folger house on its foundation. Both Linda and Bruce leaped to their feet; but they felt a little tingle of awe when they saw that old Elmhurst still sat sewing. It was as if the calm that dwelt in the Sentinel Pine outside had come down to abide in her. No force that the world possessed could ever take it from her.

They heard the rumble and creak of the trees as the wind smote them, and the flame of the lamp danced wildly, filling the room with flickering shadows. Bruce straightened, the lines of his face setting deep. He glanced once more at the rifle in his hands.

"Linda," he said, "put out that fire. If there's going to be an attack, we'd have a better chance if the room was in darkness. We can shoot through the door then."

She obeyed at once, knocking the burning sticks apart and drenching them with water. She took off the glass shade of the lamp, and the little gusts of wind that crept in the cracks of the windows immediately extinguished the flame. The darkness dropped down. Then Bruce opened the door.

The whole wilderness world struggled in the grasp of the storm. The scene was such that no mortal memory could possibly forget. They saw it in great, vivid glimpses in the intermittent flashes of the lightning, and the world seemed no longer that which they had come to know. Chaos was upon it. The tall tops of the trees wagged back and forth in frenzied signals; their branches smote and rubbed together. And just without their door the Sentinel Pine stood with top lifted to the fury of the storm.

A strange awe swept over Bruce. A moment later he was to behold a sight that for the moment would make him completely forget the existence of the great tree; but for an instant he poised at the brink of a profound and far-reaching discovery. There was a great lesson for him in that dark, towering figure that the lightning revealed. Its great limbs moved and spoke; its top swayed back and forth, yet still it held its high place as Sentinel of the Forest, passionless, patient, talking through the murk of clouds to the stars that burned beyond.

"See," Linda said. "The Turners are coming."

It was true. Bruce dropped his eyes. Even now the clan had spread out in

"You Can't!" She Cried. "You Coward—You Traitor! Kill—Kill Them While There's Time."

a great wing and was bearing down upon the house. The lightning showed them in strange, vivid flashes. Bruce nodded slowly.

"I see," he answered. "I'm ready."

"Then shoot them, quick—when the lightning shows them," she whispered in his ear. "They're in range now." Her hand seized his arm. "What are you waiting for?"

He turned to her sternly. "Have you forgotten we only have five shells?"

He asked, "Go back to Elmhurst."

Her eyes met his, and she tried to smile into them.

"Forgive me, Bruce—it's hard—to be calm."

But at once she understood why he was waiting. The flashes of lightning offered no opportunity for an accurate

shot. Bruce meant to conserve his little supply of shells until the moment of utmost need. The clan drew nearer. They were riding slowly, with ready rifles. And ever the storm increased in fury. The thunder was so close that it no longer gave the impression of being merely sound. It was a veritable explosion just above their heads. The first drops of rain fell one by one on the roof.

Bruce's eyes sought for Simon's figure. To Simon he owed the greatest debt, and to lay Simon low might mean to dishearten the whole clan. But although the attackers were in fair range now, scarcely two hundred yards away, he could not identify him. They drew closer. He raised his gun, waiting for a chance to fire. And at that instant a resistless force hurled him to the floor.

There was the sense of vast catastrophe, a great rocking and shuddering that was lost in billowing waves of sound; and then a frantic effort to recall his wandering faculties. A blinding light cut the darkness in twain; it smote his eyeballs as if with a physical blow; and summoning all his powers of will he sprang to his feet.

There was only darkness at first; and he did not understand. But it was scarcely less duration than the flash of lightning. A red flame suddenly leaped into the air, roared and grew and spread as if scattered by the wind itself. And Bruce's breath caught in a sob of wonder.

The Sentinel Pine, that ancient friend and counselor that stood not over one hundred feet from the house, had been struck by a lightning bolt, its trunk had been cleft open as if by a giant's ax, and the flame was already springing through its balsam-laden branches.

CHAPTER XXVII

Bruce stood as if entranced, gazing with awed face at the flaming tree. There was little danger of the house itself catching fire. The wind blew the flame in the opposite direction; besides, the rains were beating on the roof. The fire in the great tree itself, however, was too well started to be extinguished at once by any kind of rainfall; but it did burn with less fierceness.

Dimly he felt the girl's hand grasping at his arm. Her fingers pressed until he felt pain. His eyes lowered to hers. The sight of that passion-drawn face—recalling in an instant the scene beside the camp fire his first night at Trail's End—called him to himself. "Shoot, you fool!" she stormed at him. "The tree's lit up the whole countryside, and you can't miss. Shoot them before they run away."

He glanced quickly out. The clan that had drawn within sixty yards of the house at the time the lightning struck had been thrown into confusion. Their horses had been knocked down by the force of the bolt and were fleeing, riderless, away. The men followed them, shouting, plainly revealed in the light from the burning tree. The great torch beside the house had completely turned the tables. And Linda spoke true; they offered the best of targets.

Again the girl's eyes were lurid slits between the lids. Her lips were drawn, and her breathing was strange. He looked at her calmly.

"No, Linda. I can't—" "You can't!" she cried. "You coward—you traitor! Kill—kill them while there's time!"

She saw the resolve in his face, and she snatched the rifle from his hands. She hurled it to her shoulder and three times fired blindly toward the retreating Turners.

At that instant Bruce seemed to come to life. His thoughts had been clear ever since the tree had been struck; his vision was straighter and more far-reaching than ever in his life before, but now his muscles weakened, too. He sprang toward the girl and snatched the rifle from her hand. She fought for it, and he held her with a strong arm.

"Wait—wait, Linda," he said gently. "You've wasted three cartridges now. There are only two left. And we may need them some other time."

He held her from him with his arm; and it was as if his strength flowed into her. Her blazing eyes sought his, and for a long second their wills battled. And then a deep wonder seemed to come over her.

"What is it?" she breathed. "What have you found out?"

She spoke in a strange and distant voice. Slowly the fire died in her eyes, the drawn features relaxed, her hands fell at her side. He drew her away from the lighted doorway, out of the range of any of the Turners that should turn to answer the rifle fire. The wind roared over the house and swept by in clamorous fury, the electric storm dimmed and lessened as it journeyed on.

These two knew that if death spared them in all the long passage of their years, they could never forget that moment. The girl watched him breathlessly, oblivious to all things else. He seemed wholly unaware of her now. There was something aloof, impassive, infinitely calm about him, and a great, far-reaching understanding was in his eyes. Her own eyes suddenly filled with tears.

"Linda, there's something come to me—and I don't know that I can make you understand. I can only call it strength—a new strength and a greater strength than I ever had before. It's something that the pine—that great tree that we just saw split open

—has been trying to tell me for a long time. Oh, can't you see, Linda? There it stood, hundreds of years—so great, so tall, so wise—in a moment broken like a reed. It takes away my arrogance, Linda. It makes me see myself as I really am. And that means—Power."

His eyes blazed, and he caught her hands in his.

"It was a symbol, Linda, not only of the wilderness, but of powers higher and greater than the wilderness. Powers that can look down, and not try to tear to pieces those who in their folly harm them. There's no room for such things as vengeance in this new strength. There's no room for murder, and malice, and hatred, and bloodshed."

Linda understood. She knew that this new-found strength did not mean renunciation of her cause. It did not mean that he would give over his attempt to reinstate her as the owner of her father's estates. It only meant that the impulse of personal vengeance was dead within him. He knew now—the same as ever—that the duty of the men that dwell upon the earth is to do their allotted tasks, and without hatred and without passion to overcome the difficulties that stand in the way. She realized that if one of the Turners should leap through the door and at-

And the Triumph on Bruce's Face Changed to a Singular Look of Wonder.

tack her, Bruce would kill him without mercy or regret. She knew that he would make every effort to bring the offenders to the law. But the ability to shoot a fleeing enemy in the back, because of wrongs done long ago, was past.

Bruce's vision had come to him. He knew that if vengeance had been the creed of the powers that ruled the world, the sphere would have been destroyed with fire long since. To stand firm and straight and unflinching; not to judge, not to condemn, not to resent; this was true strength.

"I know," the girl said, her thoughts wandering afar. "Perhaps the name for it all is—tolerance."

"Perhaps," he nodded. "And possibly it is only—worship!"

The Turners had gone. The dimming lightning revealed the entire attacking party half a mile distant and out of rifle range on the ridge; and Bruce and Linda stole together out into the storm.

The green foliage of the tree had already burned away, but some of the upper branches still glowed against the dark sky. A fallen branch smoldered on the ground, hissing in the rain, and it lighted their way.

Awed and mystified, Bruce halted before the ruin of the great tree. He had almost forgotten the stress of the moment just passed. It did not even occur to him that some of his enemies, unseen before, might still be lurking in the shadow, watching for a chance to harm. They stood a moment in silence. Then Bruce uttered one little gasp and stretched his arm into the hollow that the cleft in the trunk had revealed.

The light from a burning branch behind him had shown him a small, dark object that had evidently been inserted in the hollow tree trunk through some little aperture that had either since been closed up or they had never observed. It was a leathern wallet, and Bruce opened it under Linda's startled gaze. He drew out a single white paper.

He held it in the light, and his glance swept down its lines of faded ink. Then he looked up with brightening eyes.

"What is it?" she asked. "The secret agreement between your father and mine," he told her simply. "And we've won."

He watched her eyes brighten. It seemed to him that nothing life had ever offered had given him the same pleasure. It was a moment of triumph. But before half of its long seconds were gone, it became a moment of despair.

A rifle spoke from the covers beyond—one sharp, angry note that rose distinct and penetrating above the noise of the distant thunder. A little tongue of fire darted, like a snake's head, in the darkness. And the triumph on Bruce's face changed to a singular look of wonder.

CHAPTER XXVIII

To Simon, the night had seemingly ended in triumph, after all. It had looked dark for a while. The bolt of

lightning, setting fire to the pine, had deranged all of his plans. His men had been thrown from their horses, the blazing pine tree had left them exposed to fire from the house, and they had not yet caught their mounts and rallied. Young Bill and himself, however, had tied their horses before the lightning had struck and had lingered in the thickets in front of the house for just such a chance as had been given them.

He had not understood why Bruce had not opened fire on the fleeing Turners. He wondered if his enemy were out of ammunition. The tragedy of the Sentinel Pine had had no meaning for him; and he had held his rifle cocked and ready for the instant that Bruce had shown himself.

Young Bill had heard his little exultant gasp when Linda and Bruce had come out into the firelight. Plainly they had kept track of all the attacking party that had been visible, and supposed that all their enemies had gone. He felt the movement of Simon's strong arms as he raised the rifle. "Those arms were never steadier. In the darkness the younger man could not see his face, but his own fancy pictured it with entire clearness. The eyes were narrowed and red, the lines cut deep about the bloodhound lips, and mercy was as far from him as from the Killer who hunted on the distant ridge."

But Simon didn't fire at once. The two were coming steadily toward him, and the nearer they were the better his chance of success in the unsteady light. He sat as breathless, as wholly free from telltale motion as a puma who waits in ambush for an approaching deer. He meant to take careful aim. It was his big chance, and he intended to make the most of it.

The two had halted beside the ruined pine, but for a moment Simon held his fire. They stood rather close together; he wanted to wait until Bruce offered a clear target. And at that instant Bruce had drawn the leathern wallet from the tree.

Curiosity alone stayed Simon's finger as Bruce had opened it. He saw the gleam of the white paper in the dim light; and then he understood.

Simon was a man of rigid, unwavering self-control; and his usual way was to look a long time between the sights before he fired. Yet the sight of that document—the missing Folger-Ross agreement on which had hung victory or defeat—sent a violent impulse through all his nervous system. For the first time in his memory his reflexes got away from him.

It had meant too much; and his finger pressed back involuntarily against the trigger. He had not taken his usual deliberate aim, although he had seen Bruce's figure clearly between the sights the instant before he fired. Simon was a rifleman, bred in the bone, and he had no reason to think that the hasty aim meant a complete miss. He did realize, however, the difficulties of night shooting—a realization that all men who have lingered after dusk in the duck blind experience sooner or later—and he looked up over his sights to see the result of his shot. His self-control had completely returned to him; and he was perfectly calm about the whole matter.

From the first second he knew he had not completely missed. He raised his rifle to shoot again.

But Bruce's body was no longer revealed. Linda stood in the way. It looked as if she had deliberately thrown her own body as a shield between.

Simon spoke then—a single, terrible oath of hatred and jealousy. But in a second more he saw his triumph. Bruce swayed, reeled and fell in Linda's arms, and he saw her half-drag him into the house.

He stood shivering, but not from the cold that the storm had brought. "Come on," he ordered Young Bill. "I think we've downed him for good, but we've got to get that paper."

But Simon did not see all things clearly. He had little real knowledge of the little drama that had followed his shot from ambush.

Human nature is full of odd quirks and twists, and among other things, symptoms are misleading. There is an accepted way for men to act when they are struck with a rifle bullet. They are expected to reel, to throw their arms wide, and usually to cry out. The only trouble with these actions, as men who have been in battlefields know very well, is that they do not usually happen in real life.

Bruce, with Linda's eyes upon him, took one rather long, troubled breath. And he did look somewhat puzzled. Then he looked down at his shoulder.

"I'm hit, Linda," he said in a quiet way. "I think just a scratch."

The tremendous shock of any kind of wound from a thirty-four caliber bullet had not seemingly affected him outwardly at all. Some hours were to pass before he completely understood. The truth was that the shock of that rifle bullet, ordinarily striking a blow of a half-ton, had cost him for the moment an ability to make any logical interpretation of events. The girl moved swiftly, yet without giving an impression of leaping, and stood very close and in front of him. In one lightning movement she had made of her own body a shield for him, in case the assassin in the covert should shoot again.

Her arms went about and seized his shoulders. "Stagger," she whispered quickly. "Pretend to fall. It's the one chance to save you."

He dispelled the mists in his own brain and obeyed her. He swayed, and her arms went about him. Then he fell forward.

Her strong arms encircled his waist and with all her magnificent young strength she dragged him to the door. It was noticeable, however—to all

eyes except Bruce's—that she kept her own body as much as she could between him and the ambush. In an instant they were in the darkened room. Bruce stood up, once more wholly master of himself.

"You're not hurt bad?" she asked quickly.

"No. Just a deep scratch in the arm muscle near the shoulder. Bullet just must have grazed me. But it's bleeding pretty bad."

"Then there's no time to be lost." Her hands, in her eagerness went again to his shoulder. "Don't you see—he'll be here in a minute. We'll steal out the back door and try to ride down to the courts before they can overtake us—"

In one instant he had grasped the idea; and he laughed softly in the gloom. "I know. I'll snatch two blankets and the food. You get the horse."

She sprang out the kitchen door and he hurried into the bedrooms. He snatched two of the warmest blankets from the beds and hurled them over his shoulder. He hooked the camp ax on his belt, then hastened into the little kitchen. He took up the little sack containing a few pounds of jerked venison, spilled out a few pieces for Elmhurst, and carried it—with a few pounds of flour—out to meet Linda. The horse still stood saddled, and with deft hands they tied on their supplies and fastened the blankets in a long roll in front of the saddle.

"Get on," she whispered. "I'll get up behind you."

She spoke in the utter darkness; he felt her breath against his cheek. Then the lightning came dimly and showed him her face.

"No, Linda," he replied quietly. "You are going alone—"

She cut him off with a despairing cry. "Oh, please, Bruce—I won't! I'll stay here, then—"

"Don't you see?" he demanded. "You can make it out without me. I'm wounded and bleeding, and can't tell how long I can keep up. We've only got one horse, and without me to weigh him down you can get down to the courts—"

"And leave you here to be murdered? Oh, don't waste the precious seconds any more. I won't go without you. I mean it. If you stay here, I do, too. Believe me if you ever believed anything."

Once more the lightning revealed her face, and on it the determination of a zealot. He knew that she spoke the truth. He climbed with some difficulty into the saddle. A moment more and she swung up behind him.

The entire operation had taken an astonishingly short period of time. Bruce had worked like mad, wholly disregarding his injured arm. Just beyond, Simon with ready rifle was creeping toward the house.

"Which way?" Bruce asked.

"The out-trail—around the mountain," she whispered. "Simon will overtake us on the other—he's got a magnificent horse. On the mountain trail we'll have a better chance to keep out of his sight."

She spoke hurriedly, yet conveyed her message with entire clearness. They knew what they had to face, these two. Simon and whoever of the clan was with him would lose no time in springing in pursuit. They each had a strong horse, they knew the trails, they carried long-range rifles and would open fire at the first glimpse of the fugitives. Bruce was wounded; slight as the injury was, it would seriously handicap them in such a test as this. Their one chance was to keep to the remote trails, to lurk unseen in the thickets, and try to break through to safety. And they knew that only by the doubtful mercy of the forest gods could they ever succeed.

Linda took the reins and pulled out of the trail, then encircled a heavy wall of brush. She did not wish to take the risk of Simon seeing their forms in the dimming lightning and opening fire so soon. Then she turned back into the trail and headed into the storm.

Simon had clear enough memory of the rifle fire that Linda had opened upon the clan to wish to approach the house with care. It would be wholly typical of the girl to lay her lover on his bed, then go back to the window to wait for a sight of his assassin. She could look straight along a rifle barrel! A few moments were lost as Young Bill and himself encircled the thickets, keeping out of the gleam of the smoldering tree. Its light was almost gone; it hissed and glowed in the wet snow.

They crept up from the shadow, and holding their rifles ready, opened the door. They were somewhat surprised to find it unlocked. The truth was it had been left thus by design; Linda did not wish them to encircle the house to the rear door and discover Bruce and herself in the act of departure. The room was in darkness, and the two intruders rather expected to find Bruce's body on the threshold.

(TO BE CONTINUED.)

Matter Full of Holes.

It was first shown by Thomson that matter is neither continuous nor homogeneous. He showed by an experiment that hydrogen can be passed into a vacuum bulb through an incandescent platinum window. In a similar way sodium passes through glass, and this is a useful bit of knowledge in the manufacture of vacuum tubes, because sodium can be passed into the tube to absorb the residual oxygen. Belatti, the Italian physicist, has shown that hydrogen can pass through cold iron. Matter may therefore be generally regarded as full of holes.

Think twice before you speak and thrice before you write.

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)

Fig. 1—Hook-Up for Double Ground, Spark Transmitter.

While the regular form of radio communication has been widely used in boy scout encampments, there are limitations which restrict its use to those scouts more advanced in the art. For instance, the wave-length regulations must be rigidly adhered to, and special licenses must be secured before the sets may be placed in operation. The "air" cannot be used indiscriminately for fear of causing serious interference with receiving sets for which the messages are not intended.

There is another form of communication which is suitable for scout camps and which is deserving of wider application. The double ground system has been little used in this country, although it was of immense value to the front line of the French army during the World war. The transmitter is so simple and well known as to require little explanation, for its most important unit is the well-known spark coil. This instrument has fallen into disrepute in radio to a great extent, not only because of its gruff and uncertain tone, but also on account of the poor tuning qualities of sets using spark coils. But with the double ground hook-up there is no tuning required, and since it is useful primarily for slow speed communication the low note is no obstacle.

In Fig. 1 appears the hook-up for a double ground transmitter. The terminals of the spark coil are placed a fraction of an inch apart and a wire run out in each direction, where contact is made with the ground. The longer these two wires, the greater will be the possibilities for distant communication, although if they are about fifty feet in code conversation may be carried on over distances not exceeding one-half mile. If insulated wire is used it may be strung on the ground, although if it isn't insulated it should be kept a foot or two off the ground by wooden stakes. The grounds may be in the form of iron pipes about four feet long driven deep into the earth; the better the contact, of course, the better will be the results. In fact, a short strip of chicken wire, buried a foot or two beneath the soil, is ideal for the purpose. No connection should be made to piping systems, for that would destroy the possibilities of longer distance.

In Fig. 1 is shown a sample receiving circuit. There is no tuning required, all that is needed being an audio-frequency amplifier. WD-11 tubes may easily be used, with two dry cells for lighting the filaments. This arrangement is indicated, and a single rheostat is used. The receiving arrangements are identical with those of the transmitting system as far as the ground wires are concerned.

There is an unusual advantage in the double ground arrangement in that it is directional. Fig. 2 shows a typical arrangement of double ground outfits at a boy scout camp. There are, let us assume, one headquarters station and four outposts. The headquarters station is equipped with four grounds, forming two double grounds,

Fig. 2—Arrangement of Transmitting Stations.

with a double pole, double throw switch connected so that either may be used. First, suppose outpost "A" to be sending. On account of the high resistance of the soil between the two grounds of station "A," the electric currents must of necessity spread out materially in passing between one of A's grounds and the other. There is a considerable difference of voltage between the two grounds, as any scout who happens to get his hands on the secondary terminals will testify! Therefore, between grounds 3 and 4 of the "HQ" station there will also be a difference of voltage, on account of the weak currents set up by station "A." The farther "HQ" is from "A," the weaker will be the currents, and the response in the telephone receivers correspondingly weaker. But suppose "HQ" were to switch over to grounds 1 and 2. What would happen then?

Since 1 and 2 are both on the same line to "A," there will be no difference of voltage and hence no signal in the telephones. How convenient!

But with grounds 1 and 2, station "HQ" is all set to receive from station "C," whose signals were excluded in the first case. "HQ" and "D" might, therefore, be carrying on a conversation, and at the same time "A" and "B" could start up and exchange some messages without bothering the other two at all. Of course, it is necessary to use the compass quite accurately, as scouts are trained to do, in placing the grounds.

To Have Ground That Will Keep Itself Wet

Most fans in hooking up a radio outfit either have a poor aerial and a good ground or a good aerial and a poor ground. Almost always it's a poor ground. Here is a very simple way to make a good ground, one that will keep itself wet for a long time without having to watch it.

Secure a piece of galvanized pipe three-quarters inch in diameter and 5½ feet long, also a piece of two-inch pipe

three feet long. Drive the three-quarter inch pipe into the ground about one foot. Fill the pipe with water and let it settle, then fill it up again. The water in the two-inch pipe serves to keep the smaller pipe full all the time and also keeps the ground wet around the smaller pipe.—Dick H. Roberts.

Your Receiving Sets Must Be Kept Clean

Cleanliness and neatness are important for efficient operation of a radio receiving set. Dust should not be allowed to gather on the instruments for it causes leaks in the circuit. Dust between the plates of a variable condenser develops short circuits, and collections of dust or soot on the antenna insulators make it easy for the radio currents to leak away to the ground before they reach the receiving set.

One operator noticed the signals gradually growing weaker. He overhauled the entire set, carefully inspecting all connections, but this failed to locate the trouble. He began to lose faith in radio. One morning while dusting about the room his wife just happened to brush the dust off the spiderweb coils mounted on top of the cabinet. That night the set worked to perfection, as it did when first installed.

Keep Storage Battery in Proper Condition

The following pointers will be helpful in keeping your A battery in proper condition: Do not allow the battery to become completely discharged. Always maintain the level of the electrolyte (acid and water) above the tops of the plates, usually one-quarter inch. Keep the battery well charged at all times, as it is difficult to revive a dead battery which has been standing idle for a long time.

Do not allow the electrolyte to bubble over on to the tops of the cells. If this happens, reduce the charging rate. Keep the top clean to avoid leakage loss.

Determine the gravity range of your particular battery and keep it within proper limits by frequent tests with a hydrometer.

France Requires No License. The committee appointed by the French ministry of posts and telegraphs has recommended that no licenses be required for receiving apparatus.

Aspirin

Say "Bayer" and Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for

Colds Headache
Toothache Lumbago
Earache Rheumatism
Neuralgia Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Drug-gists also sell bottles of 24 and 100. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Advertisement.

SHOCK TO PICTURE LOVER

Guest's Enthusiasm Over What He Considered Modern Art Must Have Been Exceedingly Painful.

His collection of pictures was world-famous. Vandyck, Velasquez, and Rembrandt, Rubens, Romney, and Reynolds graced the walls of his house. With conscious pride the host showed him his treasures.

His guest was unmoved and silent until the moment of departure. Then he spoke.

"How wonderful that modern-style portrait of your wife is in the bath room!"

"What do you mean?" said his host; "there is no picture in the bath room."

"Surely there is," his guest replied, "opposite the window, unframed."

"That," gasped his host, "is a plan of the hot-water pipes!"

Usual Procedure.

One day Arthur and the little boy downstairs, Bobby, were playing together. Arthur, in his endeavor to run away from Bobby, stumbled and fell, then began to cry. Bobby, feeling sympathetic, bent over Arthur and said, "Don't cry, Arty." But Arthur only said: "Well, when a fella falls he's gotta cwy."

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

The Modern Drug Store.

"Yes, the drive on safety razors has been a wonderful success," said the manager of the drug store, "there's a big demand for the 75-cent dictionaries, and the lawnmowers are beginning to move, but our sale of indigestion tablets is falling off rapidly. We must do something to counteract that."

"Why not inaugurate a side line in chafing dishes?" suggested the efficiency expert.

Don't Forget Cuticura Talcum

When adding to your toilet requisites. An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum), 25c each everywhere.—Advertisement.

Conceit Serves a Purpose.

Conceited men are a harmless kind of creatures, who, by their overweening self-respect, relieve others from the duty of respecting them at all.—Henry Ward Beecher.

Sure Relief FOR INDIGESTION

Organized Barbarism.

War, which society draws upon itself, is but organized barbarism, an inheritance of the savage state, however, disguised or ornamented.—Louis Napoleon.

SHINOLA

AMERICA'S HOME SHOE POLISH
Black - Tan - White - Ox-Blood - Brown

In the handy box that opens with a turn of the key. No broken nails or soiled hands. Softens and preserves leather. Sheds moisture. Shoe shining with SHINOLA is a nifty thrifty habit.

"The Shine for Mine"

Northcliffe's Generosity.

Sir Philip Gibbs, writing in the World's Work, tells the following story about Lord Northcliffe's generosity:

He was very generous at times to those who served him. I know one man who approached him for a loan of £100.

He was shocked at the idea.

"Certainly not! Don't you know that I never lend money? I wouldn't do it if you were starving in the gutter."

Then he wrote a check for £100, and said: "But I'll give it to you, my dear fellow. Say no more about it."

New York to Peking.

Turning from trials of speed, the army air service is planning a four-stop route between New York and Peking by way of Nome and Bering strait. It figures that the flying time between New York and the Chinese capital will be 65 hours and the fare about \$1,200 a passenger.—Youth's Companion.

Stearns' Electric Paste

is recognized as the guaranteed exterminator for Rats, Mice, Ants, Cockroaches and Waterbugs.

Don't waste time trying to kill these pests with powders, liquids or any experimental preparations.

CONSTANT improvement in operating methods, in construction and in purchasing has resulted in many definite economies of operation from which our customers naturally benefit.

The economies effected in the use of coal are particularly striking because a constant reduction of the average consumption of coal per kilowatt hour has been developed in the company's plants.

Today, through increased efficiency in operation, it requires but 2.44 pounds of coal per kilowatt hour. In 1903 it took 23 pounds of coal to generate one kilowatt hour of energy. That this economy of the nation's resources is of first importance can be better appreciated when it is known that this company generated for its customers last year 366,843,534 kilowatt hours of electricity.

The company required 416,654 tons of coal in generating this vast amount of electrical energy.

To assure itself of an adequate supply of coal necessary to maintain uninterrupted service to customers the company owns important coal mines. This arrangement has not only enabled the company to have a continuous and ample supply of coal, but has prevented the cost of coal used from increasing to the extent that it would have otherwise.

In addition to the great amount of coal used in operating the electric generating stations, the company's gas plants used 100,268 tons of coal last year, and made more gas from each ton of coal than ever before.

These economies resulting from central station service could not be passed on to customers in the form of greater service without the advantages that have been developed out of the consolidation into this company of many small and inefficient power plants.

Naturally, these small companies could not draw upon the engineering skill, which a large company has available, nor could they provide the facilities necessary to maintain uninterrupted and satisfactory service. This company, constantly increasing its plant and distribution facilities, has but one purpose and that is, to give continuously good service to the greatest possible number of customers at the lowest practical cost.

Important News Events of the World Summarized

Washington

The Navy department at Washington announced selection of Captain George W. Steele to command the navy dirigible ZR-3, the biggest airship in the world, now being completed in Germany.

Approximately four hundred clerks were dismissed by the various departments of the government at Washington Saturday because of the expiration of the fiscal year, it was learned.

E. L. Porterfield was appointed special assistant prohibition commissioner, with headquarters in Washington. He has been serving as divisional prohibition chief, with headquarters at Toledo.

Over the protests of the railroads, the interstate commerce commission at Washington ordered the abolition of the "assigned car rule."

Foreign ships violating the Volstead act by bringing beverage liquor into American waters will be seized and their captains arrested when it appears there is a persistent intent to defy prohibition law, treasury officials at Washington decided.

Senator Fletcher (Dem., Fla.) declared at Washington that there was no waste of public funds on the trial trip of the Leviathan.

The Department of the Interior at Washington announced the opening of 2,300 acres of public lands in Routt county, Colorado.

Domestic

Four thousand two hundred and eighteen men were laid off in Detroit automobile factories during the week ending June 28, bringing the total employed in factories here to 223,013.

A two-masted schooner, 400 cases of liquor and several automobiles were seized at Hampton Bays, N. Y., by county and federal officers. Three men were arrested, but the captain and the crew escaped.

Lieutenant James A. Richner was shot and killed by his wife, who is held in the Calhoun county jail. The shooting occurred in the quarters of the couple at Camp McClellan near Anniston, Ala.

Governor Small at Springfield, Ill., signed the bill for a new \$100,000,000 hard-roads bond issue. The proposal will be submitted to the voters of the state at the election in November, 1924.

The Matson Navigation company announced that ten of its ships will bring 877,000 bags of Hawaiian raw sugar to San Francisco within the next week.

An unnamed man has presented the University of Michigan at Ann Arbor with the sum of \$100,000 to conduct archeological research work in the Near East, it is announced.

Union plasterers at St. Louis, Mo., announced they had won their fight for \$14 for the eight-hour day. This is said to be the highest wage paid these craftsmen in the United States.

Springfield, Mo., was isolated more than six hours as the result of a cloudburst and storm which caused damage of many thousands of dollars. The storm uprooted trees and tore down trolley wires.

Criminal conspiracy cases against 127 coal operators, union officials and miners, and 39 corporations, all growing out of the 1921 coal strike, were dismissed in the Federal court at Indianapolis by Judge A. B. Sanderson.

Bert Cole, aviator, and George Lawley, his mechanic, were killed when an airplane in which they were flying over the eastern suburbs of Denver, Colo., crashed to the ground.

Mayor Doremus of Detroit, Mich., and the street railway commission asked William E. Mayo, chief engineer of the Ford Motor company, to become general manager of the Detroit street railways department.

Dr. William A. Pusey of Chicago was elected president of the American Medical association at its annual convention at San Francisco, by a vote of 66 to 62 over Dr. William D. Haggard of Nashville, Tenn.

Two bandits held up the cashier of the State bank at Walton, Neb., and escaped in an automobile. The amount of their loot was said to be about \$2,300.

United States customs officers at Honolulu seized liquor from the Japanese liner, Korea Maru.

A Harrisburg dispatch says seventeen-year locusts have begun to appear in four Pennsylvania counties. They are expected to spread to nineteen more.

Rev. E. J. Hjerpe of Chicago, twenty-three years president of the Swedish Evangelical Mission Covenant of America, was re-elected at Duluth, Minn.

The International Association of Lions Clubs at Atlantic City unanimously elected John S. Noel of Grand Rapids, Ia., as president.

Fair play for both capital and labor was asked by President Harding in his address at Helena, Mont. The President declared that those who imagined his administration would sympathize with projects for the "deflation of labor and the overthrow of labor organizations have come to realize their error."

I. W. W. leaders announced at Portland, Ore., that the organization is planning another strike within the next few weeks on the Pacific coast and in the Pacific Northwest, and that work in the harvest fields would be stopped.

Bert and Bertha, eleven-month-old twins, and Vivian, three, children of Mr. and Mrs. Gunner Wickman of Gladstone, Mich., were burned to death in a fire that destroyed their home.

Mrs. Bessie Harrison Coffey, known on the stage and screen as Bessie Eyton, was granted a divorce at Los Angeles, Cal., from Clark Coffey, whom she charged with nonsupport.

Experiments at the State School for the Deaf at Jacksonville, Ill., show that some deaf persons are able to hear by use of an ordinary telephone with an amplifying attachment like those on radio instruments.

United States forest rangers are fighting a number of forest fires near Anchorage, Alaska. Ordinarily rain puts out incipient forest fires, but for a month there has been hardly any rain here.

Rodney H. Brandon, supreme secretary of the Loyal Order of Moose, reported at the convention in Mooseheart, Ill., that the order now has 1,592 lodges in the United States and Canada.

Personal

Malcolm McNeill, pioneer Chicago wholesale grocer, died at his home there. He was ninety years old.

Foreign

Their faces masked, hands of strikers raided steel plants at Sydney, Nova Scotia, and induced a number of workers to leave. Clashes have occurred between strikers and police.

The Finance Ministry has introduced a bill in parliament at Budapest authorizing the issuance of securities by financial institutions, with wheat as the unit of value.

"Pure invention," said Secretary Mellon on reaching London, when asked about a Washington report that wet foreign liners will be seized by American authorities.

Since April 1 the government at Dublin has recommended the release of 835 of the prisoners who were captured during the civil war, according to an official announcement.

Marquis Curzon, in the house of lords at London, said the United States' act in raiding foreign ships and seizing liquor does not violate international law, but does violate international practice, and that Great Britain never would agree to a twelve-mile limit at sea.

A Dusseldorf dispatch says Ruhr miners have received an increase of 25,000 marks daily, making their wage 75,000 marks daily. This is equivalent to 60 cents. The miners want 100,000 marks daily.

Led by the dreadnaught Arkansas, which is the flagship of Rear Admiral Scyles, a squadron of American battleships arrived at Copenhagen for a ten-day stay. The squadron includes the dreadnaughts Florida, Delaware and North Dakota.

Premier Nikola Puchitch of Jugoslavia was attacked and slightly wounded shortly after leaving the house of parliament at Belgrade. Six shots were fired at him, one of which struck his left hand.

The death list from a storm that smote western Ontario Monday mounted to five as restoration of communication systems progressed, says a Toronto dispatch. The estimate of property loss remains at \$1,000,000.

Pending his trial on a charge of resisting the government, Archbishop Tikhon will be released, according to a Supreme court decision at Moscow. Reports are current that he will never be tried.

Leon Meana, president of the Socialist society, was assassinated at Gijon, Spain.

The foreign affairs committee of the chamber of deputies at Paris adopted a report by Deputy Margaine authorizing the loan of 300,000,000 francs to the government of Jugoslavia.

The Communist party, which had applied for affiliation with the Labor party, was turned down by a vote of 2,880,000 to 368,000 at the annual Labor party conference in London.

AMERICAN FARM BUREAU

MARKETING EGGS BY CO-OPERATIVE PLAN

Conference of Women Appoint Committee to Organize.

"Way for the women! They are to have their own great national co-operative marketing enterprise. The advent of farm women into the economic field is for the purpose of improving the distribution of farm-laid eggs. Through the standard type of collective selling, the ladies of the farm declare that they can treble their profits as poultry women and at the same time sell carefully graded, standardized, guaranteed eggs at a saving of from a nickel to a dime per dozen to the consumer.

The decision by which the farm women are to undertake the organization and control of their first national co-operative marketing association was reached by the national egg-marketing conference held in Chicago by the American Farm Bureau federation. Attending the conference were official delegates from New Jersey, New York, Ohio, Michigan, Indiana, Kentucky, Tennessee, Alabama, Texas, Oklahoma, Illinois, Missouri, Iowa, Minnesota, Wisconsin, Utah and California. Many other states were represented through written assurance of support in the hands of Walton Petet, director of co-operative marketing, who called the

Mrs. C. W. Martin, Chairman of Conference.

conference. A large percentage of the official delegates were farm women. The delegates represented state farm bureaus and other farm organizations, colleges of agriculture, state bureaus of markets, women's clubs and the United States Department of Agriculture. All of the co-operative egg-marketing groups were represented at the conference.

Mrs. C. W. Martin of Texas, chairman of the home and community department of the American Farm Bureau federation, was elected chairman of the conference. She invited Mrs. H. W. Lawrence of Ohio to share the honors of presiding.

The conference instructed the chairman to appoint an adequate general committee to work out a standard plan for the co-operative marketing of eggs.

Mrs. Martin will announce the personnel of the committee within a comparatively short time. The general committee will select state organization committees to initiate campaigns to organize farmers and the families of farmers to merchandise their eggs in an intelligent and orderly fashion. The conference ordered that in any such campaigns "the women of each state be given a dominant part, because of our recognition of the fact that the marketing of eggs has heretofore been left, in a majority of cases, to the control of the women members of the farm families, and because the proceeds from the sale of eggs have been used in direct home expenditures by such women members and are directly concerned with the comfort and standard of living in such homes."

Walton Petet of the American Farm Bureau federation summarized the results of the conference by stating that the new committee would prepare definite plans for co-operative marketing of eggs; the egg producers would organize local associations to assemble and grade their eggs; the locals would federate into state selling agencies, and the state associations would be co-ordinated into a great national egg-producers marketing association. "A local co-operative marketing association," said Mr. Petet, "can do no better than to sell well on a bad market. A national organization, representing a co-ordination of local effort, can improve the market."

The farm woman has evidently determined that the price of eggs has something to do with social improvement and community advancement. She enters the economic field as the next big forward step in her fight for better rural homes.

The following resolution was adopted by the conference:

Resolved, by the National Egg Marketing conference, assembled at Chicago, Ill.:

1. That the egg industry should be organized for orderly and intelligent marketing.

2. That an adequate general committee be selected by the chairman of this conference to work out a standard plan for such intelligent and orderly marketing of eggs, adjusted where necessary to the special needs of any particular

state or group of states; and that this plan provide for local organization among the owners of hens, and for federation of such local organizations within each state, and for co-ordination between states in the marketing of all eggs, and for standardizing and grading eggs, and for merchandising eggs co-operatively and intelligently, in the hope of bringing better returns to the producer and better and cheaper eggs to the consumer.

3. That this general committee secure a selection of state organization committees in the sections in which immediate organization work should be started.

4. That these state organization committees be selected after conference with representatives of the states involved and include representatives of all groups which may be essential to complete the proper organization in such states, depending on their internal local conditions.

5. That the state organization committees, under the co-ordinating direction and supervision of the general committee, initiate campaigns to secure the support of the farmers and the families of farmers for this standard plan, each campaign to be varied in accordance with the conditions of each state.

6. That in any such campaigns the women of each state be given a dominant part, because of our recognition of the fact that the marketing of eggs has heretofore been left, in a majority of cases, to the control of the women members of the farm families, and because the proceeds from the sale of eggs have been used in direct home expenditures by such women members and are directly concerned with the comfort and standard of living in such homes.

EFFICIENCY IN FIRE DEPARTMENT SERVICE

Unique Zone Plan Originated in Chester County, Pa.

To secure the greatest possible efficiency in fire department service for the rural districts the Chester county (Pa.) farm bureau has originated a unique fire zone plan.

The actual conception of the plan was probably started as a result of an appeal made to Maj. C. M. Wilhelm of the state bureau of fire protection from the Chester county farm bureau for closer co-operation.

At a meeting of farmers Major Wilhelm urged organization with townships as the unit. The first township to get organized was Westtown township, which was the most completely organized township of any in the county for farm bureau work.

The principal factors of the fire zone plan started by this township, and subsequently developed for the remaining townships, were dependent upon the co-operation of the following agencies:

Fire department service represented by the Chester County Firemen's association and the borough council of West Chester.

Bell Telephone company. Township supervisors. Roads arranged in the zone directory, under their supervision, and contributions made to the fire department.

State police under state bureau of fire protection. Neighborhood service under zone directors.

All fires are reported to the zone director and to the nearest fire department. The zone director gets the neighborhood service into action by arousing the proper township fire chiefs, of which there are at least two in every township, and then starts in to arouse the neighbors of the fire victim. This plan is turned over to a zone director, because he is trained to know his territory better than could be possible by a dozen or more different telephone operators.

Once the fire chiefs are on the ground they are in a position to decide whether extra equipment of any kind is needed, or the state police should be notified.

The importance of neighborhood service and the value of state police becomes more and more evident every day by reason of the fact that hundreds of automobiles block fire department service and bring strangers who are not slow in taking advantage of the chance to loot the premises of the fire victim.

The West Chester fire zone includes all or part of 11 townships in Chester county, and two townships in Delaware county, all points of which are within ten miles of the fire department.

FORM EASTERN FEED POOL

Farm Bureaus and Farmers' Exchange Officially Join Hands for Buying Grain.

Massachusetts' farm bureaus and Eastern States Farmers' exchange will officially join hands in promoting and establishing co-operative buying of feed and grain throughout the state. Major attention will be given the 1923 grain pool. The various county farm bureaus will secure local agents in territory not already organized. A large increase over last year's tonnage is prophesied.

Saving in Cotton Pool. John T. Orr, executive committee-man of the American Farm Bureau federation and president of the Texas Farm Bureau Cotton Marketing association, states that the Texas pool of cotton this year was operated at a saving of \$2,500,000 to its members.

\$310,000,000 U. S. SURPLUS

Vindication of Budget System Seen in Showing for Last Fiscal Year.

MORE THAN WAS EXPECTED

Gen. H. M. Lord, Director of the Budget, Issues Statement of Receipts and Expenditures of the Government.

Washington, July 2.—The government closed the fiscal year with a surplus of approximately \$310,000,000, according to a statement issued by Gen. H. M. Lord, budget director. This is an even more favorable showing than was estimated two weeks ago when President Harding announced that the fiscal year would end with a balance of ordinary receipts over expenditures of approximately \$200,000,000.

"The reduction is the total expenditures for the fiscal year ending June 30, 1923, as compared with the total expenditures for the fiscal year ended June 30, 1922, will be approximately \$265,000,000," General Lord said.

"One year ago, the estimated receipts and expenditures indicated a deficit of \$832,000,000 for the fiscal year 1923. The difference of \$1,133,000,000 between this estimated deficit of \$832,000,000 and the present estimated surplus of \$310,000,000 is accounted for by an increase in receipts of \$767,000,000 and a reduction in the estimated total expenditures of \$366,000,000.

"The difference in receipts was occasioned by an increase of \$213,000,000 in customs receipts, \$423,000,000 in internal revenue receipts, and \$131,000,000 in miscellaneous receipts.

"The difference of \$366,000,000 in total estimated expenditures was the result of a reduction of \$151,000,000 in general expenditures and \$45,000,000 in interest on the public debt, and a net decrease of \$170,000,000 in capital outlays, operations in special accounts, refunds of tax receipts and retirement of the public debt required to be made from ordinary receipts."

Two Men Drown in Ditch When Automobile Turns Turtle

Hammond, Ind., July 2.—James Bloomer and Alexander Duncan of Chicago drowned when the automobile in which they were driving from Chicago to the Tippecanoe river overturned in a ditch nine miles southeast of Hammond. They were pinned face down in the water, which was about two feet deep.

2,500 Whippings in Oklahoma in One Year Reported

Oklahoma City, Okla., July 2.—Explanation of why Governor Walton is determined to put an end to mob outrages in Oklahoma and is ready to use military force, if necessary, was made by the executive's secretary, Aldrich Blake, who declared "whipping parties" during the past year have numbered at least 2,500.

Farmers Urged to Hold Wheat to Boost Price

Washington, July 2.—A proposal was made public by the American Farm Bureau federation that a minimum of 200,000,000 bushels of wheat be withdrawn by American farmers from this year's visible supply in view of this country's indicated large surplus.

100 Slain When Russian Factions War in Korea

Shanghai, July 2.—A shipload of Russian refugees arrived at Wousung, at the mouth of the Yanktze river, bringing the story of a bloody battle at Gensan, Korea, between rival Russian factions, who had fled from Vladivostok. One general and 100 of the rank and file fell in the fight.

Three Brothers Electrocuted While Riding Hay Derrick

Twin Falls, Idaho, July 2.—Three brothers, Glen, Tom and Lloyd Aken, farm hands, were electrocuted at their ranch home near Tuttle, Idaho, when a hay derrick on which they were riding came in contact with an electric transmission line carrying 40,000 volts.

Rebels in China Led by American Officer

Peking, July 2.—Capt. L. D. Kearney, formerly an officer of the American army, is the leading figure in the "Confederate States of China," which has been organized in an attempt to seize the government of the country in the present confusion.

Nine Belgian Soldiers Killed. Dusseldorf, Germany, July 2.—Nine Belgian soldiers were killed by the explosion of a time bomb in a passenger car of a train carrying Belgian soldiers on leave back to Belgium from the Ruhr.

Wolves Attack Boy in Texas. Fort Worth, Tex., July 2.—Donald Matheson, ten-year-old son of a ranchman at Paradise, was attacked by a pack of wolves in a pasture and severely injured before his father rescued him.

MIGHT BE IN EITHER PLACE

Lawyer's Ghost Could Have Been Telephoning From Heavenly Home, or the Other Spot.

Governor Morrison of North Carolina said at a dinner:

"With mysterious voices floating to us on the one hand from our broadcasting stations, and with Conan Doyle on the other ding-donging his spiritualistic miracles in our ears, we can't help getting superstitious and jumpy at times.

"The death of a lawyer was announced in the papers by mistake the other morning, and a brother lawyer believed the announcement. While he was brooding over it at his breakfast his telephone bell rang.

"Bill," said a strangely familiar voice, "this is Jim Tallafiero, Bill. Did you see the announcement of my death?"

"The breakfasting lawyer shook so that the breakfast dishes rattled.

"Yes, Jim, I saw it," he said with a gulp. "Where are you speaking from?"

Corroborating Daddy. Robert's parents were figuring household expenses, when his mother cried, disgustedly, "Oh, I can't figure!"

"Daddy's right!" exclaimed her little son; "ladies don't make good business men."

If coffee disagrees drink Postum

There's a Reason

TO RELIEVE PAIN AND BACKACHE

Women May Depend upon
Lydia E. Pinkham's Vegetable Compound

Minneapolis, Minn.—“I had heard so much about Lydia E. Pinkham's Vegetable Compound that when I realized I needed to take something to relieve my pains and backache, and to help build me up I began to take that. I had been sick off and on for years and barely weighed a hundred pounds, but now I have had such good results that I am recommending the Vegetable Compound to every one.”—Mrs. J. J. BIEBER, 3339 18th Ave. South, Minneapolis, Minn.

Finds a True Friend

“Every woman who values her health should be proud to have a true friend like the Vegetable Compound,” says Mrs. W. E. Shaw, 8227 Walnut Street, Chicago, Illinois. “I had female weakness so badly that I could not stand on my feet. Half of my time was spent in bed and I had pains in my back which were unbearable. I tried everything I could think of to help myself, and when a friend advised Lydia E. Pinkham's Vegetable Compound I began taking it at once. I recommend it without hesitation.”

Her Secret.

The newly married pair were seated in a cozy armchair in front of the fire.

“Dearest,” said the young bride, “have you any secrets to hide from your wife?”

“None, my pet,” replied hubby proudly.

“Then, I, too, will have none from you,” she said in heroic tones.

“What, have you a secret?” he asked in a startled voice.

“Only one,” she said firmly and slowly, “and I am going to tell it to you.”

“Go on,” he muttered hoarsely.

“For some weeks I have had a secret longing for a fur coat for a birthday present.”

A Modern Wedding.

“Do you take this woman for your wedded wife?” “Yes, parson, with reservations.”

Help That Achy Back!

Are you dragging around, day after day, with a dull, unceasing backache? Are you lame in the morning; bothered with headaches, dizziness and urinary disorders? Feel tired, irritable and discouraged? Then there's surely something wrong, and likely it's kidney weakness. Don't neglect it! Get back your health while you can. Use Doan's Kidney Pills. Doan's have helped thousands of ailing folks. They should help you. Ask your neighbor!

An Illinois Case

Mrs. E. Moeckel, 407 S. Hubbard St., Staunton, Ill., says: “I felt sore and lame and had severe headaches and dizzy spells. I was troubled with my kidneys acting irregularly and I felt tired and languid mornings. I heard of Doan's Kidney Pills so I got a box. Doan's relieved the soreness in my back and took all the dizzy spells away.”

LESSON FOR JULY 8

MARY, THE MOTHER OF JESUS

LESSON TEXT—Luke 1:26-38, 38-56; 2:1-20, 41-52; John 19:25-27.
GOLDEN TEXT—“Thou shalt call His name Jesus; for He shall save His people from their sins.”—Matt. 1:21.

REFERENCE MATERIAL—Matt. 1:18-2:12; John 2:1-11; John 19:25-27.
PRIMARY TOPIC—Mary and the Baby, Jesus.

JUNIOR TOPIC—Mary and the Boy, Jesus.

INTERMEDIATE AND SENIOR TOPIC—Notable Incidents in the Life of Mary.

YOUNG PEOPLE AND ADULT TOPIC—Mary, the Mother of Jesus.

I. Mary at Nazareth (Luke 1:26-38, 46-56).

Mary was a Jewish maid of the town of Nazareth. The first information we have of her is that she was engaged to be married to Joseph, a carpenter of the same village. It seems that the custom among the Jews was for betrothal to take place a year before marriage. During this interval the woman remained with her parents.

1. Gabriel Sent from God to Mary (vv. 26-38).

It was during this interval of betrothal before Joseph and Mary were married that God sent the angel Gabriel to announce unto Mary that she was to be the mother of Jesus. Isaiah, more than 700 years before, prophesied that a virgin should give birth to a son whose name should be called Immanuel (Isa. 7:14). Though at first perplexed, she accepted the announcement with remarkable courage and devotion. To be told that she was to be a mother was nothing startling, for this was the normal desire of every married Jewish woman. Under the circumstances she accepted motherhood at a tremendous cost. She was conscious of her virgin purity. She knew that to become a mother under such circumstances would expose her to unutterable suspicion and shame. This was the view that certain Jews took of the matter, for they insinuated to Jesus that He was born of fornication (John 8:41). Her faith was such that she responded with noble courage. She said, “Behold the handmaid of the Lord; be it unto me according to thy word” (Luke 1:38).

2. Her Wonderful Song (vv. 46-56). In her embarrassment she set out on a visit to an elderly kinswoman named Elizabeth. Having sought the sympathy and encouragement of this friend, her triumphant faith carried her beyond the misunderstanding, the scorn and shame which awaited her, and caused her soul to burst out in this most wonderful song of praise.

II. Mary at Bethlehem (Luke 2:1-20).

What Gabriel announced to Mary was now being fulfilled. Caesar's decree concerning taxation brought Joseph and Mary to Bethlehem at the opportune time for the fulfillment of Micah 5:2. Because of the crowded condition of the inn, the birth of the world's Saviour took place in a cave-stable.

III. Mary in Jerusalem and Galilee (Luke 2:41-52).

Jesus, now at the age of twelve, was a child of the law, for at this age the child took his responsibility as a worshiper.

1. Failure in Vigilant Care (v. 43). They had left the city and gone a whole day's journey without knowing where the child was.

2. Failure to Understand Fully Jesus' Action and Words (v. 50). No particular censure should attach to this, as it is beyond our ability even now to understand all these things.

3. Failure to Properly Sympathize with Jesus' Deepest Longings and Emotions. “How is it that ye sought me? Wist ye not that I must be about my Father's business?”

4. Failure to Perceive Her Limit of Masterfulness. The time comes when duty to God takes precedence over duty to parents. All these limitations should be viewed with the background of her deep devotion to God. Her whole life was lived in a spiritual atmosphere. She was just the kind of woman to whom God would trust the upbringing of His Son. Jesus went back with them to Nazareth and was subject unto them.

IV. Mary at the Cross (John 19:25-27).

This was a great trial. For any mother to see her son die is a trial, but what must it have been for this mother in the face of all the sacred memories that clung to her soul? It is beautiful to note the tender care which Jesus in His dying hour manifested for His mother. He committed her to the care of John. John accepted the responsibility of a son and took her to his home.

Our Mistakes.

There are few, very few, that will own themselves in a mistake, though all the world see them to be in down-right nonsense.—Swift.

No Such Thing as Luck.

There is no such thing as luck. It's a fancy name for being always at our duty, and so sure to be ready when the good time comes.

The Art of Learning.

The great art of learning is to undertake but little at a time.—Locke.

Daddy's Evening Fairy Tale

by MARY GRAHAM BONNER
COPYRIGHT BY WESTERN NEWSPAPER UNION

BILLIE BROWNIE'S NEWS

“Well,” said Billie Brownie, “here I am back again after quite a day's trip.”

“We do want to hear all your news,” said the little people of Fairyland and Bennie Brownie gave his brother a big hug which sent them both sprawling on the mossy ground.

“Early this morning I saw a little girl sitting high up in an apple tree. Some one had made seats and corners for her in the tree and she was half lying down and half sitting up on these boards spread over a part of the apple tree.

“She was also eating some of the apples from the tree and it seemed pretty fine I thought to be able to perch one's self so comfortably in an apple tree upon which were fine apples. She had other boards which led up above her reading corner and I heard her say, ‘Now I think I'll go upstairs and sit for a little while.’

“So then I knew that she called part of the tree the upstairs part and that she played house in the tree. Oh, it was just as cosy as it could be and it did look the most wonderful sort of a place in which to play.

“From the apple tree to the pear tree, just a little beyond, a hammock swung and when I was passing by that way later I saw the little girl swinging in the hammock. Then on another tree, a big pine tree, there was a fine trapeze and there were swings and I knew that the little girl could do all sorts of fine tricks.

“From there I went to have a chat with a white cat I'd meant to call upon for some time and the cat told me that above all things in the world he liked his comfort best. Yes, he said he would rather be comfortable than anything else. He said he cared for his mistress but not so much as he did for his comfort. He told me that he knew he was handsome and admired by all and so he always accepted all attention and acted as though it merely was his right.

“Next I went and called on a little Pekingese dog. He would not speak to me for he was busy yelping and yapping and barking for the luncheon the people were eating before they had a chance to eat a bite themselves. His shrill little voice yapped without stopping and he tried to get his food at once. He did, too. Oh, yes, he was given some food right away and he said to me, ‘If a big dog did that no one would have any use for him but I can be as disagreeable as I want to be and they stand for it and pamper me. Yet I am not the devoted creature another dog might be. I'm all right, but I'm not really devoted.’

“From there I went to call on Willie Woodthrush and what a lovely time I did have there!

“Willie sang for me his lovely bell-like, clear, glorious song. He looked so handsome in his brown suit and reddish brown cap and his light colored vest dotted with black so as to make him look very smart.

“He is a good-sized thrush, too. Willie told me how they warned each other when strangers came near the mud and grass nest home when the green-blue eggs were within the nest.

“Willie said that the wood thrushes are very fond of bathtubs which are fixed for them by people. Oh, yes, he said, they were very grateful for such cool and restful hospitality. And then he sang again for me, his song of the woods and the streams.

“I don't think anyone can sing quite as Willie does, and he told me, too, that as Willie does, and he told me, too, that he and other members of his family were singing for rain and that sometimes people called him a rain bird because he called for rain.

“And then I saw a Beetle helping Mrs. Beetle by going forth and attending to all sorts of business matters, coming back again to help her with the household tasks.

“Mrs. Beetle said that Mr. Beetle helped provide most beautifully and that they both worked together ever so well. She said Mr. Beetle had no thoughts save for her and the young Beetle children. And after that I started for home, and here I am,” ended Billie Brownie.

“Well,” said the others, “we think you saw a good many in one day. And we always love to hear about the calls you make.”

Fattening Calves.

Boys and girls in 15 counties of Kentucky are fattening more than 425 baby beef calves for the annual fair cattle show and sale at Louisville November 23 and 24.

BABIES CRY FOR “CASTORIA”

Prepared Especially for Infants and Children of All Ages

Zonite!

The Greatest of all Antiseptics

What It Is

ZONITE is a concentrated, stabilized and perfected form of the Carrel-Dakin Solution. The Carrel-Dakin Solution is an antiseptic developed during the World War by two eminent scientists. War hospital records show that it reduced amputations and deaths from infection over seventy per cent and saved the lives of hundreds of thousands of desperately wounded men. It has been adopted and is in daily use by the medical profession and in hospitals throughout the civilized world.

By standard laboratory tests Zonite has more than three times the germicidal strength of pure carbolic acid. It has about seventy-five times the germicidal strength of peroxide hydrogen and forty times the germicidal strength of any solution of carbolic acid, iodine, bichloride of mercury, etc., that can be applied with safety to the human body.

In addition to its high germicidal efficiency, Zonite is non-poisonous, non-irritating, non-caustic and healing. It can be used freely and frequently on the delicate membranes and tissues of the human body without harm.

What It Does

For Preventing Contagious Diseases

Until the discovery of this form of antiseptic, it was impossible to introduce freely into the mouth and nose any antiseptic solution at sufficient strength to destroy disease germs effectively. It is in the prevention of germ diseases, therefore, that Zonite finds one of its greatest fields of usefulness. During epidemics of colds, grippe, scarlet fever, diphtheria, measles, whooping cough, sore throat and other respiratory diseases, when every sneeze and draft scatters millions of germs, Zonite should be used frequently as a throat spray and nasal douche.

For Cuts and Wounds

Zonite should be promptly applied to a fresh cut or wound to destroy the germs which cause blood poisoning and other similar forms of infection. In addition to acting as a disinfectant, it will shorten the process of healing and greatly reduce the usual pain and inflammation.

As a Mouth Wash

A solution of one teaspoonful Zonite added to one-quarter glass of water used night and morning as a mouth wash will destroy breath odors and act as an excellent preventive against pyorrhea. Dental authorities have stated that the daily use of Zonite in this manner, together with regular dental inspection, reduces the likelihood of contracting this disease to a minimum.

Sore Throat

Nearly all the ailments of the throat are due to bacterial infection. Prompt relief, therefore, can not be obtained without the use of an effective germicide. One part Zonite to five parts water as a gargle or throat spray usually clears up and controls throat infections. In severe cases, especially when ulcerations are present, the throat should be swabbed with pure Zonite and your physician called. Begin treatment promptly when symptoms first appear.

For Burns, Scalds and Blisters

Zonite is especially valuable in the treatment of burns, scalds and blisters. It prevents infection, aids in removing charred or dead tissue, helps to reduce inflammation, and accelerates healing. It also lessens scars and disfigurements that are apt to follow wounds of this character.

For Personal Hygiene

Zonite is the ideal antiseptic for personal hygiene. Poisonous caustic compounds, such as bichloride of mercury, phenol and creosol solutions, etc., are tremendously harmful when used regularly for douche medication. Any physician will verify this statement. Write for the Zonite booklet on personal hygiene for women.

For Dandruff

Dandruff (seborrhea sicca) and many other scalp irritations are due to bacterial infection. Zonite has proved remarkably effective in removing these annoying conditions. It kills the micro-organisms, dissolves and removes the scaling incrustations and exercises a stimulating and tonic effect on the scalp tissues and hair follicles.

For Catarrh

Zonite affords a most efficient local treatment for this condition. Used as a nasal spray it quickly loosens the hardened incrustations of mucous matter, clears up the nasal passages and soothes and heals congested membranes. Note—Atomizer fittings in which Zonite is used must be of hard rubber.

Rash, Skin Eruptions

There are numerous kinds of skin eruptions classed as eczema. Many of these yield readily to the application of Zonite. A few trials will demonstrate whether or not the antiseptic will be of service. Chronic skin troubles and skin troubles induced by system disorders should receive the attention of a physician.

For Old Sores

Zonite is remarkably effective in healing old sores and slow healing wounds. Used in a strong solution it will aid in dissolving dead tissue and removing proud flesh. By killing the germs, it stops the discharge of pus, rendering the sore clean and healthy. A milder solution used daily will aid in rapid healing.

Poison Ivy

In cases of poison ivy and similar plant poisoning, Zonite is perhaps the most effective remedial agent known to materia medica. It acts with extraordinary promptness in cleaning up the inflammation and restoring the skin to a normal condition.

For Insect Bites

As a relief from bee stings, mosquito bites, chiggers and many other insect bites, Zonite is particularly effective. If promptly used, the antiseptic will lessen the pain and reduce swelling and irritation.

Bad Breath (halitosis)

Breath odors are usually caused by a bacteriological condition of the mouth. Zonite is the one form of antiseptic with real germicidal power that can be used freely in the mouth. Its effect is far more thorough and far more lasting than pleasant tasting mouth washes heretofore used for this purpose.

For Body Odors

Objectionable body odors are caused by a germ (bacterium foetidum) which infects the sweat glands of the armpits, feet, etc. A scientific body deodorant must not only dispel the odor but destroy the germs which cause it. Deodorants which merely replace one odor with another or clog the pores are harmful and inefficient. Zonite kills the germs, destroys body odors promptly and effectively and leaves no odor of its own.

Rids the Home of Deadly Poisons

It is no longer necessary to keep the skull and crossbones type of antiseptic in the home. Zonite, while highly germicidal, can cause no fatal accident. It also supplants pleasant tasting mouth washes and gargles, heretofore in general use, that according to government reports, have no detectable germicidal power.

Zonite is a clear, colorless liquid that does not stain and leaves no odor. It is the last word of science on the subject of antiseptics. Ask your druggist for the Zonite “Handbook on Antiseptics,” which describes fully the protection which the antiseptic brings to the home.

Tinley Park, Ill.

OVER TEN THOUSAND PERSONS AT GREAT KU KLUX KLAN GATHERING AT JOLIET SATURDAY

Kneeling in the glare of three flaming crosses and encircled by robed and hooded knights, 612 candidates were initiated into the mysteries of the Ku Klux Klan in a wooded pasture just off the South Chicago street road, Joliet, last Saturday.

Most of the initiates were from Joliet. Others, according to information given out by the klansmen, came from as far away as Indiana and Wisconsin, with many from Northern Illinois communities. Mokena, Tinley Park and Orland were well represented.

Picnic in Afternoon

The initiation was the climax of a program that opened shortly after noon when klansmen motored to the pasture and with their families held a picnic. Knights wearing the Klan regalia and mounted on horses patrolled the entrances to the field to see that only those having credentials were allowed to enter.

Spectators Line Roads

Crowding the parking space along the roads that bordered the field were automobiles filled with spectators whose curiosity brought them to the interesting scene of the gathering. As soon as the oath had been administered to the initiates a band on the grounds struck up the Star-Spangled Banner.

About 10,000 Witness Ceremony

It is estimated that fully 10,000 persons witnessed the initiation ceremony. Sheriff Walker and his deputies directed traffic outside the field. At midnight the gathering broke up and the klansmen left for home.

ORLAND NEWS

Mrs. Charles Cooper who was ill is now convalescing at the home of Mr. and Mrs. Edgar Cooper.

The Ladies Guild was held at the home of Mrs. Quigley on Friday, June 29th.

The recital given by the pupils of Mrs. Raymond Cooper was a big success.

The Orland M. E. church celebrated its 25th birthday, Sunday, June 24. The program was as follows:

Prelude—"Holy, Holy, Holy"
Mrs. M. H. Neumeier.

Solo (Selected) Mr. Ernest Evans
Greetings from former Pastors.
Hymn—"All Hail the Power of Jesus Name".
Benediction.

The barn dance given by Mr. and Mrs. Christian Kuech was attended by all the surrounding neighbors.

The road on 143rd street is concreted to Mr. Raney place and it is hoped to finish up to the R.R. tracks by next Saturday. There upon the subway on Kean Ave. will be completed and then concreting will begin at Goesville.

Services at the Christ Lutheran church July 8th, 10 a m German, 7:45 p m English.

Quite a change has taken place in the telephone operating office. Miss Agnes Guederan and Miss Adella Schenadehe having resigned, a new telephone manager was sent out from Harvey and Miss Rose Enders employed as assistant.

On June 29th a few friends surprised ev. Greves and his daughter Ruth on their birthday. Quite an entertaining evening was spent playing bunco. Among those present were Mr. and Mrs. L. Nicoloi, Mr. and Mrs. Charles Nicoloi, Mr. and Mrs. Wm. Nicoloi, Mr. and Mrs. Louis Raske, Mr. and Mrs. Phil Steffen, Mr. and Mrs. John Habernich, Mr. and Mrs. Hary Knech, Miss Korechi, Mrs. Emily Schmidt, Mr. and Mrs. Wm Raney and Mr. and Mrs. Emil Bettelhausen. All wished the pastor and his daughter many happy returns of the day.

The services of Christ Lutheran church are being attended by more people right along.

Last week the engineer N. Hancock of La Grange was at Orland looking over the water situation. Let us hope that adequate water supply and fire protection will be made for both new schools.

The foundation for Kruepe's garage has been laid.

How the farmers will reach the milktruck when the concrete is laid in Orland is a puzzle to solve. It seems every farmer will be forced to travel at least five miles to deliver his milk to the truck.

The "True Blue" Sunday School Class spent a delightful day at Lincoln Park, June 27.

The graduating class of the Orland High School was entertained by Miss Davis at her home on Friday, June 29.

Mr. and Mrs. Edgar Cooper entertained at dinner Sunday the following guests: Mr. and Mrs. Thomas Cooper and daughter Lucile, Mr. and Mrs. Charles Cooper and son Stanley, Mr. and Mrs. S. L. Sayers and Lester Sayers.

Clarence Beagley is on the sick list.

ev. and Mrs. Greve of Orland will

motor to Milwaukee on Monday, July, the 2nd.

The coffee, held June 28th, at the home of Mrs. Christ Kuech was a success although the weather was rather cool. About 40 ladies turned out. Mrs. L. Nicoloi walked away with the prizes.
